**Labour Market Information**

Labour Market Information (LMI) refers to the current state of the jobs market. This information can refer to the jobs market locally, regionally or nationally. This information is key to make informed decisions when job hunting, planning for career progression or researching pathways into employment. LMI can include:

- The industries that operate in a specific area, as well as the career opportunities within those industries.
- The sectors that are growing in a specific area, region or nationally, which can inform students of future job opportunities.
- The skills in high demand generally, or that are needed in a specific job role.
- Typical rates of pay and employee incentives on offer.
- Career progression opportunities.

4 Areas of Opportunity

Careers @ GPA

The **4 sectors of opportunity** are the largest growth sectors in the Northeast. This means that career opportunities are increasing in these areas.

The **4 supporting sectors** are areas which support the growth sectors. This means there are also numerous career opportunities in these areas also.

Scan the QR code for a list of careers, skill and qualification requirements for each sector.

Education | Financial, professional and business services | Transport and logistics | Construction
